

## **ADFC Bicycle Travel Analysis**

Methodology and results of the 2021 cycling year

Monitoring and evaluation of cycle tourism routes

Cykelfrämjandet | November 22<sup>nd</sup>, 2022

## Methodology

### Methodology

Data collection between November and January...

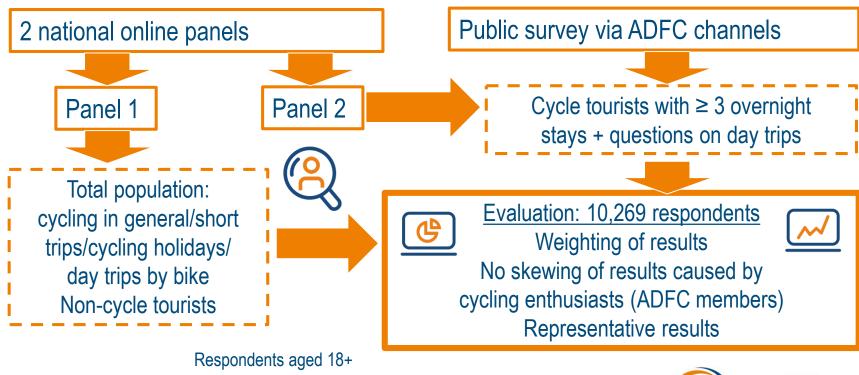

...data analysis between January and March...

...presentation of the results in March

- A portion of the data is generated through two closed national representative panels; the other portion is obtained during an open survey published via the ADFC's communication channels.
- Depending on the panel between 90 and 60 questions
- Handling time between 20 and 30 minutes

## Methodology

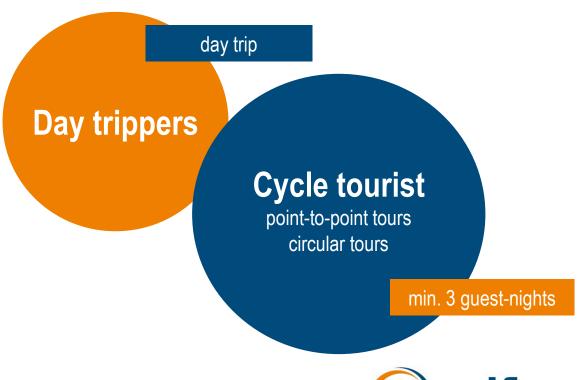

#### Types of cycle tourists

Differentiation between day trippers and cycle tourists

#### Definition of cycle tourists:

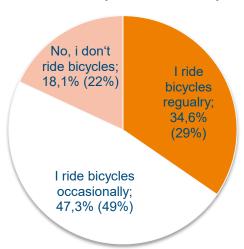

»A cycle tourist is someone who has gone on at least one trip lasting at least three nights in the past three years during which cycling was one of the main motives.«

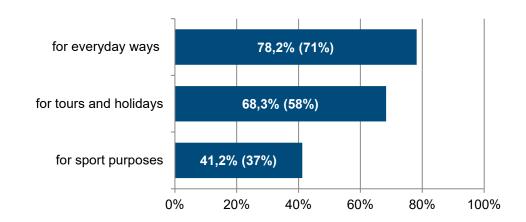

# Questions – Results Use of bicycles

#### General use of bicycles

#### Use of bicycles in Germany

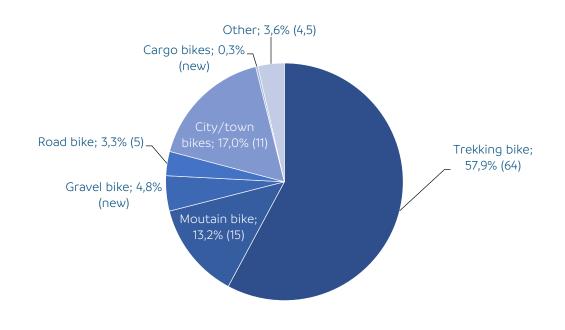

#### Purpose of bicycle use in Germany

Value in brackets = comparative value from 2020

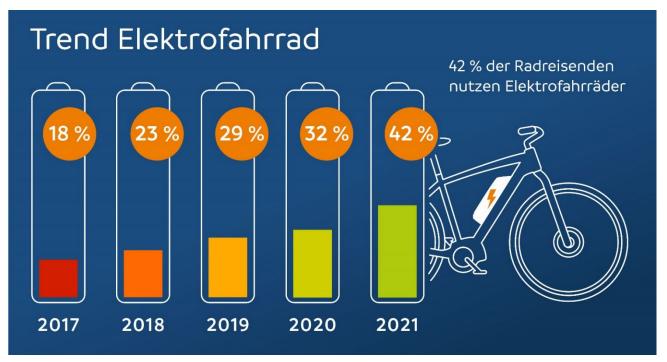

### Bicycle types used for cycling trip

#### Use of e-bikes still growing

## Questions – Results Planning and motives for cycling trips

#### Motives for a cycling trip

## Cycle trip planning – important aspects

Monitoring and evaluation of cycle tourism routes

71%	sights/attractions along the route
70%	traffic safety (e.g. separate routes with less traffic)
66%	route navigability (e.g. route surface and width) Infrastructure
61%	cyclist-friendly accommodation
48%	gastronomic offers
37%	accessibility using public transport
32%	easy topography, flat route
30%	route's thematic design
17%	challenging topography
13%	cycling services along the cycle route, e.g. charging stations, repair/maintenance, bike hire services

15

## Questions – Results Travel behaviour

## point-to-point- & circular tours

#### point-to-point tour

Tourists cycle along a long distance cycle tour with changing accomodations

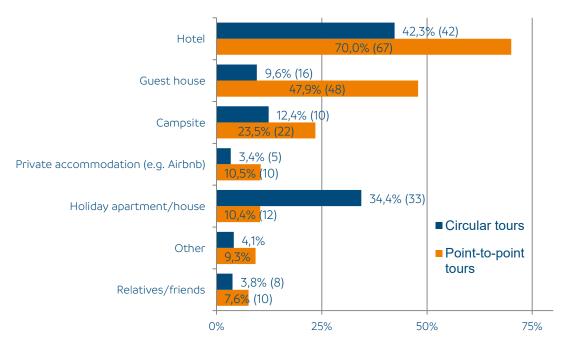

#### circular tour

Cycle tourists discover a region from a defined accomodation

Streckentour vs. Sterntour © ADFC/april Agentur

#### Accomodation during a cycle trip

The following aspects were particularly important to cyclists when choosing accommodation:

- location/access (76%)
- price-performance ratio (69%)
- cyclist-friendly facilities and services (40%)

85% of cycle tourists were satisfied with the quality of their accommodation.

#### Information

#### **During trip preparation**

82 % Internet research (76 %)

44 % Recommendatations from friends (43 %)

41 % Apps (35 %)

41 % Printed cycling maps (42 %)

#### **During cycling trips**

**75 % Signage** (67 %)

61 % Apps (52 %)

58 % Mobile internet research (47%)

19

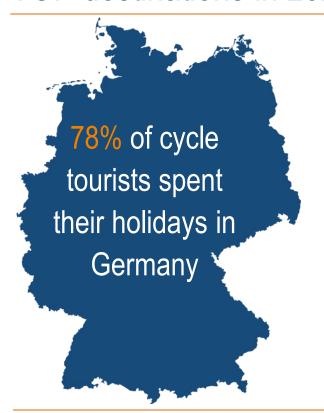

47 % Printed cycling maps (48 %)

Local signposting continues to gain in importance. At the same time, the use of apps continues to grow in popularity.

# Questions – Results Favoured regions and routes

#### TOP destinations in 2021

70% of cycle tourists cycled the route/region for the first time. For 30%, it wasn't the first time they cycled the route/region.

#### **TOP 5 abroad**

1.	Austria	(36	%)
----	---------	-----	----

B. France (14 %)

4. Netherlands (11,2 %)

5. Switzerland (11,1 %)

21

## TOP cycling regions in 2021

In 2021, the most popular region for cycle tourism was Osnabrücker Land | Emsland | Grafschaft Bentheim

TOP 10 Radregionen 2021 © ADFC/april Agentur

### TOP long-distance cycle routes in 2021

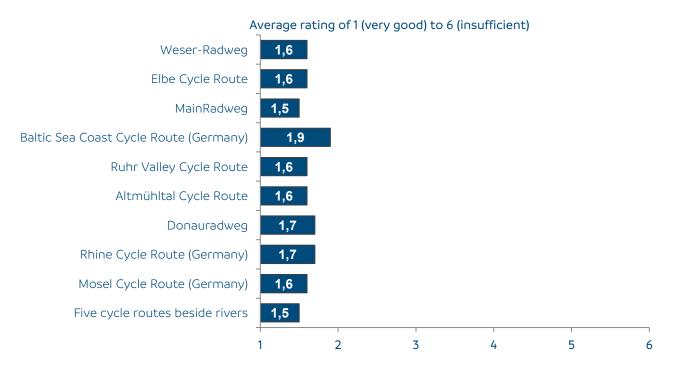

In 2021, the Weser Cycle Route was the most popular long-distance cycle route

TOP 10 long-distance cycle routes in 2021 © ADFC/april Agentur

#### Satisfaction with the long-distance cycle routes travelled

# Questions – Results Outlook for the next year

## Outlook for the 2022 cycling year

- 68% of cycle tourists are planning a cycling trip in 2022, 28% are still undecided
- Especially those who did a cycle trip in 2021, are planning another one in the following year
- 76% are planning a cycling trip in Germany and 26% in Europe.
